EDUCATION

Yeditepe University

Bachelor of Science in Computer Engineering

İstanbul, Türkiye

Expected Graduation, June 2027

- **Concentrations:** Software Engineering & Intelligent Systems
- **Scholarship:** Full Merit Scholarship based on YKS Ranking: **2158** / 2.5M+
- **GPA:** **2.92** / 4.00
- **Related Coursework:** Data Structures & Algorithms, Algorithm Analysis, Systems Programming (C/Assembly), Digital Systems Design (Verilog), Intro to CS & Algorithms (Java/C/Linux).

EXPERIENCE

Magibu AI

AI Researcher and Data Engineer

İstanbul, Teknopark, Türkiye

Aug 2026 - Current

- Collecting, cleaning, and organizing multilingual datasets - primarily Turkish, spanning 40+ additional languages - to support **tokenizer research** and **model training**.
- Developing **RAG-based** precedent decision-query modules by experimenting with **vector search** and optimal **chunking strategies**, conducting rigorous testing to transition experimental AI features into production-ready systems.

OBSS Teknoloji A.Ş.

AI-Native Summer Intern

İstanbul, Teknopark, Türkiye

Jul 2026 - Aug 2026

- Trained in **AI-Native software** engineering (spec-driven development, ATDD/TDD, AI orchestration), then built a full-stack mock interview platform in a small team using LLM APIs for adaptive question generation and candidate evaluation reports.
- Practiced Controlled Autonomy: authored specs, architecture decisions, and AI usage logs as quality gates, taking full technical ownership and accountability for every AI-assisted output before delivery.

Software Engineering Research Group (SERG) (ArcMotus)

Undergraduate Research Assistant

İstanbul, Türkiye

May 2025 – Current

- Contributing to the **Smart Parking Management System**, a large-scale project involving a cross-functional team of 20+ members, including one professor and alumni.
- Contributing to the **AI Powered Driver Guidance System for Charging Management Process**. Collaborating on the initial architectural design and requirements engineering for a user-centric decision support system.

Game Actor

Software Engineer Intern (Volunteer)

İstanbul, Türkiye

Sep 2024 – Oct 2024

- Developed responsive and modern user interfaces by leveraging **React** and **component-based architecture** to ensure modularity, high performance, and code reusability across web applications.

PROJECTS

ParkWiser (Smart Parking Management System)

Jr. Backend and AI developer

İstanbul, Türkiye

May 2025 – Current

- Developed backend services using **Java Spring Boot** following layered architecture patterns to ensure separation of concerns and maintainability. Integrated **Python-based AI** modules for automated system management.
- Collaborated on the full software development lifecycle. Contributed to the transition and management of a **Microservices Architecture**, focusing on system architecture and scalability within the AI and Backend teams.

Mock Interview App (AI-Native Case Study — OBSS)

AI-Native Summer Intern

İstanbul, Türkiye

Jul 2026 – Aug 2026

- Built a full-stack mock interview application that orchestrates a **multi-agent LLM pipeline** via **MCP** to generate role-specific interview questions from a pasted job posting, guide users through a sequential **Q&A flow**, and produce a structured post-interview evaluation report.
- Implemented **email/password and Google OAuth authentication** with role-based admin access, plus an admin dashboard for interview history, token/cost tracking, profession filtering, and usage statistics.

Personal LLM Fine-Tuning Experiment

ML Practitioner (Personal Project)

İstanbul, Türkiye

Feb 2026

- Prepared a custom conversational dataset from personal chat history, applying **anonymization and preprocessing** techniques to remove identifying information before formatting it into instruction-tuning pairs.
- Fine-tuned a **Qwen2.5-1.5B-Instruct** model using **Unsloth** for accelerated training, then quantized and converted the result to **GGUF** format for local inference via **llama.cpp/Ollama**.
- Project Hugging Face Link: [ahmetege-clone-v1-gguf](#)

Stabiloreach (Fall Risk Assessment SaaS for Physiotherapists)

AI & Backend Developer

İstanbul, Türkiye

Apr 2026 – Jul 2026

- Developing a **Computer Vision** module in **Python** and **OpenCV** that automates the clinical **Forward Reach Test** by detecting body landmarks from video frames and computing reach distance via height-based pixel-to-centimeter calibration to assess fall risk in elderly patients.
- Calibrating the AI model against physiotherapist-measured ground-truth videos and contributing to a **SaaS web platform** with a **Python FastAPI** backend and **React** frontend, supporting clinician dashboards, video upload analysis, and remote consultation flows.

AURA (Autism Understanding & Response Assistant)

Full Stack Developer

İstanbul, Türkiye

Feb 2026 – Jul 2026

- I am designing a microservices architecture using Java Spring Boot and Python to build a **RAG-based AI assistant** and **vector-search powered community platform**, providing **real-time crisis management** and personalized support for parents.

Pang Arcade Game (School Project)

Java OOP Developer

İstanbul, Türkiye

May 2025 – June 2025

- Developed a local version of a classic Pang arcade game using **Java**, focusing on core **OOP principles** such as inheritance and polymorphism for dynamic entity management.
- Engineered game logic and event-handling for multi-level environments utilizing standard **Java graphical libraries**.

ACTIVITIES AND LEADERSHIP

Sponsorship Coordinator

Securing corporate sponsorships for projects on Project Team of IEEE Yeditepe Student branch.

İstanbul, Türkiye

Aug 2025 – Aug 2026

SKILLS

Programming & AI: Java, C, Python, JavaScript, HTML/CSS, React, Retrieval-Augmented Generation (RAG), Fine-Tuning, Vector Search, Embedding Models, MCP, Multi-Agent Pipelines, AI Agent Architectures, Prompt Orchestration

Tools: IntelliJ, PyCharm, Eclipse, Git, Spring Boot, Docker, PostgreSQL, Adobe Photoshop, Davinci Resolve, CI/CD, LM Studio
